About This Game

Will of the Gods is an **strategical 1v1 arcade game** where players play as Gods, each trying to guide as many followers as they can to their temple, while **punishing** those who choose to follow the *other* God. It's a game about **tactics**, **skill** and proving who the **better** one is! Pick an arena, choose your game settings and activate **gamemode mutators** to create a *chaotic* duel between you and a friend your rival.

Play at your own pace - be it casually, versus an AI or heat things up and fight a friend! Will of the Gods is easy to pick up but hard to master due to several gameplay mechanics and the presence of micro-management! If, perhaps, you want both fun(the

crazy type) and to prove that you are indeed the better player, you can activate several gamemode mutators to spice up your game.

Features

- Play *Online or Offline* versus a friend or an A.I.
- Become an almighty **God!** Prove once and for all who is better!
- Change gamemode settings and activate mutators to *augment your gameplay*
- Pick from a variety of levels
- Guide followers to your temple to secure your victory
- Cast **lightning** to make enemies lose their faith or summon **tornadoes** to split large groups up !

Very Bad. Gostei do game, ele é bem simples mas é um pouco viciante xD. Owing the HD versiob of the Android version, it's good to see one of my favourite endless runners that started as a humble flash game get an HD port to Steam as well! Canabalt is still as addictive the day it came out, and just as perilous and frustrating, too.. I have 2 Logitech Controllers and 2 Logitech Keyboards but all of them count as player 1

I really don't know why I cannot have offline multiplayer and why all represent player 1

the game is very nice

Wow.....

.....

I played this over the 5 minute mark just to let everyone know if you want to buy this your either high or stupid.
Keep your money.. In to the war!

Well the name is terrific the Logo is Awesome but the game is♥♥♥♥♥♥♥♥

The game is dead and the server's too.

Poor optimization.

Couldn't even get in the damn game (online).

1/10

w8 Uninstalling work's fine though.. Not really recommended unless you still use Windows XP (the game doesn't work with windows 7), or you have the time needed to mess around with your computer settings every time you want to play it.. I bought this skin cuz I don't want to be distracted everytime I play the game
buy it if you dont want to be distracted too

. This game is amazing fun for my kids. Would recommend for anyones kids that just like to have a bit of fun.. i had a lot of fun
